EMBRYOART

FLOWEREMBRYOART

FlowerEmbryoArt

The inspiration for FlowerEmbryoArt came from a personal desire to give back to IVF couples. The fertility journey is filled with so many emotions such as hope and disappointment, joy and frustration. For many, it can be a defining time in their lives.

With FlowerEmbryoArt, I am able to reach out to these couples and honor their stories and experiences. The image should convey strength and hope, perhaps even comfort and a new beginning.

With the individual floral designs, I try to capture the feelings in the paintings. In a water bowl full of flowers. To an outsider it is just that, but to the person it is much more - an embryo. A personal and intimate story that is given its place without immediately revealing the work of art.

somehow difficult to share with
others, so it ends up in a secret.

Feedback:

„After 5 years of trying to conceive, a long struggle and one successful IVF, I wanted something that would illustrate our journey to our miracle. I wanted something personal that would give me the strength to say goodbye to our stillborn child and at the same time celebrate the love and the journey to our miracle. Lisa is an excellent artist who captures and honors the moment of life/soul creation or the path to it with a lot of heart in her design. She sensitively responds to what is desired and captures the essence of these precious moments, making them treasured and joyful to look at. Each individually crafted piece reflects her attention to detail and is a personal, elegant and beautiful keepsake. You can tell she has worked as an IVF nurse in a fertility clinic for many years. She makes you feel very well cared for and understood. I would choose her again and again as the artist for this thoughtful design for a piece of my heart!” (translated from German)
